

ElectroProject Joins Cummins Network in Holland

Cummins Power Generation (CPG) is excited to announce the appointment of ElectroProject as an Authorized Cummins Dealer for the sales and aftermarket of Low KVA diesel generator sets in Holland. Operating from its head office in Amsterdam, ElectroProject has been selected to actively promote, sell and provide factory-certified service on CPG Low KVA generator sets. ElectroProject will work in close collaboration with the Cummins Holland distributor located in Dordrecht.

“As part of our strategic growth plans in the RLC segment, Cummins has made a commitment to developing a new dealer network in targeted European countries,” said Stefano Ruzzini, sales manager, - Western Europe, Cummins Power Generation “In addition to ElectroProject, we welcomed Tincasur and Generatores Albacete in Spain and Ormad in Italy into the RLC dealer network during the first part of 2015.”

The new partnership between Cummins and Electroproject will focus on specific segments and to provide customers with the latest and most reliable power generation technology combined with premium customer service and support.

Renowned for their experience as system integrator for new projects and renovations, ElectroProject has proven capabilities in developing and supplying emergency power solutions, electrical drives and service to a variety of market segments. These segments include small local businesses, healthcare, utility/ HVAC, industry and retail, where Low KVA diesel gensets are often requested as source of standby power. ■

Representatives from ElectroProject and Cummins Power Generation formally sign the RLC Dealer agreement.
